

SUPER HARD

HARDENER FOR ALKYD BASED ENAMEL PAINTS

(Version: October 2017 . This issue replace all previous)

PRODUCT DESCRIPTION

Additive for alkyd based enamel paints. Accelerates drying and hardness development on final film. Maintains the gloss even in the most adverse weather conditions

APPLICATION INSTRUCTIONS

- For application with brush or roller, add product in paint at 10 - 20%
- For application with spray gun, add product in paint at 30 - 40%
- After addition of the product, dilution of the mixture with solvent is not required

NOTES

Do not add more SUPER HARD than it is recommended. The forming film will be harder but also more fragile. The coating must be consumed in 8 hours after addition. In any other case the coating will gel in the container.

PACKAGING

It is delivered in metallic containers of **750ml, 2.5Lt**
